

WHAT WE DO

Strengthen your Security Command Centers

By no fault of their own, Security Guards managing multiple screens at command centers often go “Monitor Blind” after looking at so many monitors. OWAL’s AI Alerts eliminates this by providing real time alerts to that particular screen.

Offer rich features that address real issues

OWAL uses real-time alerts to instantly identify the problems like smoking indoors, littering, loitering, urinating in stairwells, and other activities. We also offer Face Recognition to help you identify and stop people from entering unauthorized areas.

Modernize without breaking your budget

OWAL is a SaaS company, we aren’t focused on selling hardware. In most cases we can repurpose your existing system, eliminating the need for expensive upgrades. Our cutting edge technology & features can be deployed down to an individual camera. Scale at your pace.

Provide Actionable Insights

OWAL constantly gathers visual data to give you actionable insights. Beside strengthening your security strategy, our service can be used to understand how the traffic flows or simply to understand activity throughout your property.

MODERN BUILDINGS DESERVE MORE THAN JUST INCREMENTALLY BETTER SURVEILLANCE

As the modern workforce changes and evolves, OWAL adds a layer of intelligence to help buildings adapt and become more flexible, catering to clientele with increasingly complex needs.

OWAL transforms passive surveillance systems into proactive tools that help not only stop crime in real-time, but also discover issues that affect the overall quality of life for people in your buildings. OWAL even lets you share that data with your building community, allowing them to pinpoint the best times for the essentials; grab a bite, use gym facilities, common area availability, and even when to avoid that pesky overcrowded elevator.

With OWAL, property managers turn real-time activities into experiential insights, allowing property stakeholders to take immediate action and give residents the experience they seek.

REIMAGINING PRESENCE

OWAL's AI Surveillance solutions gives Security Personnel, Property Managers and even the building's Marketing Professionals the ability to improve the security and usefulness of a residential or commercial building. Our SaaS solution works integrates with almost any surveillance cameras system, including analog. OWAL's software instantly identifies unwanted actions or behaviors, then sends a video alert to management, so you can see the incident and take action.

OWAL's scalable and affordable solution succeeds where others fail. Unlike other companies, we offer a simple turnkey solution that doesn't require large setup fees or annual contracts. Pricing is based on a per camera, per feature, per month fee structure.

OWAL is revolutionizing surveillance. We welcome the opportunity to show you how we can instantly improve your security strategy.

AI SURVEILLANCE SOLUTION FOR RESIDENTIAL & COMMERCIAL PROPERTIES

OWAL makes it easy for you to stay in touch with your property. Alerts come to any device which allows you to view the incident in real time. Our intuitive management console and app provide you with easy setup, tracking and analytics tools.

REAL TIME ALERTS & INSIGHTS THAT IMPROVE HOW YOU MANAGE YOUR SPACE

Feature rich alerts, Cloud Storage and Out-of-Box Analytics will allow you to gather the needed insights to address the diverse needs of any property. Internal departments such as Operations, Security, Legal, Marketing, and Business Development can benefit from OWAL's service.
